

The Glorious Way She Moves explores the fullness and depth of the female form, from youthful innocence to glorious maturity. These interpretive portraits illustrate the exuberance and individuality of each muse I celebrate, emphasize the remarkable characteristics and features of women in every phase of womanhood, and exemplify the self-esteem women exude as they move through their lives and the world. The large scale format brings the women I portray into a magnified view that recognizes their magnificence as multi-faceted people. The portraits are accompanied by audio biographies. By doing this I experience a connection to their beauty without stereotyping. It is that connection I share in my work.
